

CatIQ Announces Agreement with Aon Impact Forecasting

Toronto (9 Aug 2017) - CatIQ and Aon Impact Forecasting have entered into an agreement whereby Aon Impact Forecasting's Canadian flood footprints will be made available as a layer on CatIQ's CatHUB module for the benefit of CatIQ's users effective immediately.

Adam Podlaha says *"Aon Impact Forecasting's Canadian flood footprints for events which hit Ontario, Quebec and British Columbia during May 2017 are now available on CatIQ's CatHUB module. This will enable CatIQ's users to more accurately analyse their risk exposure and prepare for future floods."*

Commenting on the announcement, Joel Baker, CEO of CatIQ said: *"The addition of Impact Forecasting's footprints will be invaluable to our subscribers"* adding that *"We are delighted to be working with Adam Podlaha and his outstanding team on this initiative"*.

Aon Impact Forecasting flood footprints are now available on the CatIQ platform for *"Eastern Canada Flooding"* (2017-05-CAT-0085) and the *"Kelowna Flooding"* (2017-05-NE-0020).
